

Advocating Open Access with Local Control

August 30, 2017

Quarterly Update

Recently, Sandicor and California Regional Multiple Listing Service (CRMLS) announced a data share agreement. This agreement will enable agents to have searchable data up through LA and surrounding areas. SDAR has always been an advocate of data sharing while retaining local control. Our goal is to ensure all members receive open access to as much information as possible.

Currently, we continue to work toward a resolution with Sandicor and the other AORs to ensure our members have an MLS that is positioned to embrace new technologies that better serve them, their business and clients. We are confident that the outcome achieved will enable our members to maintain local control and ownership of their MLS. We are hopeful a possible resolution will be reached soon.

Stay Up to Date

SDAR will continue to keep you updated through the MLS Outlook campaign. Be sure to subscribe to stay informed on all the news, events, and information on your MLS.

*The MLS Outlook is designed to share relevant trends and issues that could have an impact on your MLS and your business. We will continue to deliver information that answers the questions we are receiving from you, our members... What's REALLY happening with the MLS in San Diego? What does all this mean for your business? **It's time to join the conversation about your MLS.***
